Chapter 1. Submap title comes from here

About the manual

What is this document? Learn all about your manual.

This manual provides you information about the Ultracool 7000.

Read the manual carefully and save it for further use as the expected life of Ultracool 7000 is very long.

Always make new users of Ultracool 7000 read the manual.

The product is built on Linux.

New text here.

The product does not support server versions.

Set the time

The Coffee and Tea Machine has a clock which you can use to schedule that perfect cup of coffee or tea.

Set the time before brewing your first coffee or making your first tea. This is for the admin.

Before setting the time, check the exact time from the **Atomic Clock**. You can also call technical support.

You're great, thanks!

This product can only be serviced by qualified professionals.

Setting the time is the first thing you do when you start with your Coffee and Tea Machine.

1. Press the **Time** button once. Press the **Time** button three times.

This is common for all audiences. The button beeps once. The colour turns green.

The button beeps once.

The colour turns green.

Tässä on tekstiä.

2. Press and hold the **Arrow Up** or **Arrow Down** button to change the hours and the minutes.

Option	Description
Hours	Time of the day: whole hours.

Option	Description
Minutes	Time of the day: minutes of the hour.
Seconds	Time of the day: seconds.

In the Save group:

3. Press the **OK** button to save the time and exit.
The software saves and exits.
If the software doesn't exit, press the power key.
4. Enter PSTART.
 - Close
 - **New**
 - **Old**
5. Add a test user.
 - a. Click **File**.
 - b. Click **New**.
 - c. Click **Save**.

Test user is added.

If the user is not added, redo the steps.

Next, add another user or save the procedure in the log book.

Add coffee beans to the grinder

[coffee bean](#) are simply added to the grinder by lifting the grinder cover and pouring in the beans. The coffee grinder Ultracool 7000 must be at least 10% full to work properly. Add [coffee beans](#) to the Ultracool 7000 grinder every morning.

Here is information about the task.

This product can only be serviced by qualified professionals.

1. Press **Shut down** to switch off the Ultracool 7000 Coffee and Tea Machine.
2. Turn the grinder lock switch left until the Ultracool 7000 display shows **Open**.
3. Lift the grinder cover.

4. Pour in the coffee beans.

When the grinder has enough beans, the display shows **Full**.

Chapter 2. Instructions heading topic

Insert the water filter

The water filter purifies the tap water before brewing the coffee or making the tea.

We added some context for experts.

 **Troubleshooting:** Do something.

And prerequisites for novices only.

1. Remove the filter from its packaging.

 **Important:** Watch out for slippery roads.

2. Lift the water reservoir cover.
3. Press the **Open** button.
4. Pull the filter compartment towards you.
5. Place the filter to the compartment carefully.
6. Push the filter compartment away from you.

Change the tea filter

The built-in tea filter must be changed every six months. The built-in tea filter must be changed every twelve months.

Local safety regulations must be observed. Only technically qualified and appropriately trained personnel are authorised to open and maintain the units.

You must buy tea filters from the shop before starting the process. They will be in a [sales box](#).

1. Open the cover.
Use the [wiggly tool](#) for this procedure.
2. Open the [package](#) in which the filters are.
3. Use the [WRGT](#) again.

Chapter 3. Glossary

This glossary explains the key terms including abbreviations and acronyms.

sales box

Sales box is the package in which you receive your Ultracool 7000. It is hand-made with recyclable wood. A unique number has been carved to its side.

wriggly tool

Wriggly tool is a plastic spoon that helps you put on the Ultracool 7000 foot warmers.

wriggly tool

WRGT

coffee bean

A coffee bean is a seed of the coffee plant and the source for coffee.
